- ... Spotify® Premium 帳戶提供的音樂服務, 以便取得您最愛的音樂 (www.spotify.com/connect)

詳細資訊, 請參閱: www.bang-olufsem.com/guides

English

Use the correct size and type of screws and wall anchors – taking into account the construction and condition of the wall. Use 2 round-head screws with a diameter of 4 mm (0.16”) and wall anchors each with a minimum load rating of 2.5 kg (5.5 lbs).

Special notice about light partition walls

If you intend to hang the product on a gypsum wall (also known as drywall or wallboard), the wall bracket must be fastened to a vertical stud. Mounting was evaluated for use on a drywall surface.

Use 2 round-head screws with a diameter of 4 mm (0.16”) and a length of 50 mm (2”). 1 screw must penetrate the gypsum and be screwed a minimum of 25 mm (1”) into a vertical stud. Furthermore mount 1 screw and 1 suitable anchor of a type intended for gypsum walls.

The screws should be tightened until the distance between the bottom of the head and the drywall surface is 4 mm (0.16”).
